VINCE DARRIGO

SOFTWARE & SYSTEMS INTEGRATION

Deltona, FL | Remote | vincent.darrigo@gmail.com
vincentdarrigo.github.io/portfolio | github.com/vincentdarrigo

Software engineer with a background in solution architecture, operational workflows, and API integrations. Builds Python applications with AI coding agents, defining requirements and integration boundaries and personally validating behavior before release.

EXPERIENCE

Senior Data Specialist | Technical Lead - Safal Partners

Apr 2025 - Present | Remote

- Independently initiated a multi-role application after building the original workflow automations; lead requirements, integrations, and release validation for a large, multi-stakeholder operational program.

- Built Python services and API-connected workflows for approvals, task routing, support, and reporting. Production uses FastAPI, SQLAlchemy, and SQLite.

- Delivered mid-cycle data reconciliation and unattended synchronization with backoff, diagnostics, and preservation of human-entered information. Bulk updates use dry runs; repairs back up files first.

- Reconstructed damaged records from revision history and corrected the upstream template defect. Developed and demonstrated a newer PostgreSQL generation; production remains on the original platform.

Smartsheet Developer Specialist - Maximus

Jul 2023 - Mar 2025 | Remote

- Modernized performance and attendance workflows using Smartsheet, SharePoint, Power Automate, and reporting dashboards. Built workforce time tracking and supported Snowflake migration preparation through mapping and validation.

Data Solutions Architect - Rust Belt Technologies

Jan 2020 - Jun 2023 | Remote

- Designed business workflow applications, vendor/customer portals, and API-connected tools for smaller organizations using Microsoft 365, SharePoint, and Smartsheet.

INDEPENDENT BUILDS

Anytime AI Trivia: multiplayer trivia with WebSocket state and AI-answer challenges.
I Spy AI: real-world scavenger hunts using model-generated clues and external location data.
Predictrix: Django REST and React prediction games with standings computed from picks.

TECHNICAL TOOLKIT

Python, FastAPI, Flask, SQLAlchemy, SQL, PostgreSQL, SQLite, REST APIs, WebSockets, Socket.IO, React, TypeScript, JavaScript, Smartsheet and Google Workspace APIs, Claude Code, Codex, Git/GitHub, Render.

EDUCATION & CERTIFICATIONS

B.S., Technical Management - DeVry University | A.A., Political Science - Daytona State College
Microsoft Python Development Professional Certificate (2025) | Smartsheet Core Product Certification (2024)
